Abifor AG in Wutöschingen is among the safest companies

Award of the “Safety with System” seal of approval of BG Chemie

For the obtainment of the seal of approval of the Employers' Liability Insurance Association for the Chemicals Industry (BG Chemie), “Safety with System” there is an assessment of the occupational safety management with a particular focus on an effective leadership and working behaviour in safety and health protection. Therefore, the seal of approval is given as an award for systematic and effective occupational safety.

Simultaneously confirmed is the implementation of the German “National guideline on occupational safety management systems” NLF and the international “Guideline on occupational safety and health management systems” ILO-OSH 2001, which is recommended for application in all UNO countries.

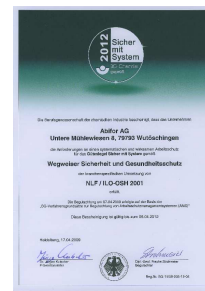

Abifor AG has been certified by TÜV Rheinland according to ISO 9001:2000 and ISO 14001:2004. With this integrated management system, the quality-oriented organisation of Abifor AG demonstrates the high requirements to product and service quality, and undertakes the responsibility for dealing with the environment in a resource-saving manner. Abifor AG also established a corporate policy for the maintenance of high quality, environmental awareness and customer satisfaction, which, among others, is published on the company's homepage. It is to clarify the high requirements to ourselves. In addition to the ISO certification, the award of the “Safety with System” seal of approval of BG Chemie also certifies that Abifor AG has completely implemented the requirements to systematic and effective occupational safety in the company.

Handover of the seal of approval by Dr. Volker Wittneben of BG Chemie to Dr. Rolf Wickihalder, CEO Abifor AG
